Dear Tom: Subject: 4 x 5" Film Chip Processor

This letter is to confirm that the Chip Processor has been completed and is standing in storage pending your shipping instructions.

The following adjustments to the machine were made, as agreed upon:

- (1) Slide release consisting of a spring loaded plunger or similar device.
- (2) A toggle switch on the inspection light. (See below).
- (3) A flow back method between tanks to prevent carry-over.
- (4) An anti-splash device on the wash tank.
- (5) Improve or complete air knife.
- (6) Complete light baffling.
- (7) Improve the developer tank to accept 9 frames per minute and higher.
- (8) Furnish operational maintenance manuals, including schematics and parts list. (See below).
- (9) Furnish total of 140 slides. (See below).
- (10) Take up magazine indicator.

Declass Review by NIMA/DOD

.../2

With regard to Item #2, a "push on - push off" switch has been provided.

In Item #8 the operating manual and recommended spares list has been drafted and we expect this to be completed by April 11th.

Item #9 - we have changed the design of the chip holders to stainless steel and 140 of these are now out for manufacture. As soon as we receive the first one we shall be forwarding it to you by the fastest possible route. This is in accordance with [redacted] request.

I trust this meets with your approval.

25X1A

Yours very truly

A large rectangular area of the document has been completely blacked out with a red marker, obscuring a signature.
